Team Members

National Sourcing, Inc.

National Sourcing, Inc. is a Service Disabled Veteran Owned Company (SDVO). Our CEO and President John D. Stanton served in the US Army from 1968 through 1971. In January of 1970 Mr. Stanton was wounded while stationed in Vietnam and awarded the Bronze Star for Valor. Mr. Stanton has an extensive background in finance, accounting and as a CEO and Board Member of several extremely successful private and public companies. National Sourcing, Inc. personnel have hands on staffing and project management experience, in IT, accounting, healthcare, sales, security guard and engineering.

Tek Source USA

TEK Source USA, Inc. is certified HubZone, Minority Business Enterprise (MBE). Associates of TEK Source USA, Inc work as a cohesive group to understand and satisfy client needs. The diverse team at TEK Source USA, Inc. includes a former Vice President of Sales of a fortune top ten consumer products company, an entrepreneur that started and sold an extremely profitable 65 million dollar manufacturing company, a controller with experience in profitable and troubled companies and associates that have in excess of 75 years of accounting, healthcare, sales and in-depth IT experience.

AppleOne Employment Services

AppleOne Employment Services has been selected to provide support for personnel required on all tasks. AppleOne was named ***Large Business Partner of the Year for 2004 by the United States Department of the Treasury***. The Teaming Arrangement with AppleOne includes the exploration of entering into a Mentor-Protégé Agreement. AppleOne is currently an approved Mentor firm in the Department of the Treasury's Mentor-Protégé Program. Furthermore, AppleOne currently is providing support to multiple Federal agencies, including:

Lockheed Martin Company

Our carefully selected Team member, Lockheed Martin Information and Technology Services (LMITS) is currently supporting Warfare Centers on active NAVSEA programs. Our Teammate is an integral part of our Seaport Enhanced Team and ensures that both current and future requirements of the Seaport Program are supported. The quality, cost, and schedule elements of our Teammate are monitored by our program management office.

Autonomic Resources

Autonomic Resources is an award winning small business. Founded in May of 2001 by John F. Keese in Raleigh, NC. We have 42 employees at 9 customer sites across the US. Our annual revenues have grown from \$120,000 in 2001 to \$3,600,000 for fiscal year 2005.

Autonomic Resources was founded as a commercial technical staffing company. Using our commercial experience and industry best practices we applied for and received our 8(a) certification in 2005 to provide services to the Federal Government. Our intention in responding to this solicitation is to provide the DoD Autonomic's lessons learned in the commercial sector. Our experience has taught us how to reduce risk and manage costs of technical services while maximizing customer and employee satisfaction

Verizon

As a leading telecommunications provider, Verizon's core capabilities of telephone switch installation, operation maintenance and network services are provided to multiple DOE National Labs as well as commercial, state and federal government organizations. Not only does Verizon provide maintenance and operational support for various DOE customers, but we have also been involved in the engineering and installation of upgraded telecommunications solutions for DOE customers. WSRC requires a qualified, experienced telecommunications provider to support their operations and provide efficient services while obtaining a level of support, which satisfies their customer needs. Below is a table, which highlights the areas of support we provide for several other DOE locations. These Statements of work are consistent with the requirements of WSRC. In addition, because all of our references are for DOE accounts, a focus on security and safety is intrinsic to our support. Our organization has over 788 personnel with clearances, thus ensuring that we have the processes in place to obtain and provide cleared personnel.

Harris Corporation

Harris is an international communications and information technology company serving government and commercial markets in more than 150 countries. With headquarters in Melbourne, Florida, the company has annual sales of \$3.5 billion and nearly 14,000 employees – including more than 6,000 engineers and scientists – dedicated to the development of best-in-class *assured communications*[™] products, systems, and services. The company's operating divisions serve markets for government communications, RF communications, broadcast communications, and microwave communications.

Craig Technologies

Incorporated in 1999, Craig Technologies is a federally HUBZone certified, small disadvantaged, service-disabled veteran-owned, federally 8(a) certified, woman-owned business. Craig Technologies specialize in Information Technology services including project management, system engineering, infrastructure installation, software design and engineering, research and development, training and many other custom information technology services. Craig Technologies is headquartered in Cocoa, FL
